Delhi, India | 8094221469 | arihantjain416@gmail.com | [Linkedin](#) | [Website](#)

SUMMARY

Senior Backend Engineer with **5+ years** of experience building distributed, event-driven systems and high-throughput APIs at scale. Focused on cost optimization, reliability engineering, and cloud-native platform architecture across large production workloads.

SKILLS

Languages	Python, JavaScript (ES6+), SQL
Frameworks	FastAPI, Node.js, RESTful API Design
Data & Messaging	Redis, MongoDB, Kafka, RabbitMQ, Celery, Amazon SQS
Cloud & Infrastructure	AWS (ECS, Fargate, Lambda, S3, EC2, CloudFormation), Docker, CI/CD
Observability & Automation	AWS Cloudwatch, Playwright, Pytest, Selenium

EXPERIENCE

Senior Software Engineer

Karza Technologies Pvt Ltd. (A Perfios Company)

Apr 2024 – Present

New Delhi, IN (Hybrid)

- Architected an identity routing platform with adaptive rate-limiting and fallback logic, eliminating a primary vendor dependency and **saving INR 6.5Cr (\$780K USD) annually**.
- Designed a multi-tier TTL Redis caching layer with fail-open socket fallback, cutting redundant API calls to save **INR 22 Lakhs/month (\$26K/month)** while maintaining **100% onboarding SLA continuity**.
- Revamped a legacy rendering engine into a Playwright-based worker cluster, slashing average processing **latency by 85% (40s to 6s)** and raising node **uptime from 60% to 98%**.
- Engineered and owned multi-region disaster recovery with failover orchestration across Kenya, UAE, Hyderabad, and Mumbai — **sustaining 5M+ daily requests at 99.9% SLA**.
- Migrated 260 production APIs to Python 3.12 and **built a unified CI/CD platform**, standardizing the runtime and enabling parallel regional deployments with **zero rollback incidents**.

Software Engineer 1

Karza Technologies Pvt Ltd. (A Perfios Company)

Oct 2022 – Apr 2024

Mumbai, IN (Remote)

- Scaled TotalKYC data extraction by building **100+ automated** integration APIs to ingest real-time data across 300+ public registries, sustaining **1M+ daily transactions**.
- Overhauled high-traffic API response paths to **cut P99 latency by 30%, directly driving a 40% increase in client adoption** for the data enrichment product line.
- Developed a distributed Celery/Fargate workload migration from external vendors, saving **INR 20 Lakhs/month** and **cutting API latency by 1.2s**.
- Improved async **billing accuracy by 25%** via event-driven webhook automation; hardened deployment pipelines by integrating VAPT vulnerability scans.
- Maintained **near-100% (99.9%+) uptime** for services processing 1M+ daily transactions using proxy-profiling, session pre-loading and routing strategies.

Software Engineer (Promoted from Intern)

InTimeTec

Mar 2021 – Sep 2022

Jaipur, IN (Onsite)

- Led 0-to-1 web migration of a full enterprise desktop application across 9 modules, tripling operational throughput within 10 months of joining.
- Slashed deployment cycles by 44%** by architecting structured CI/CD pipelines and championing technical standards across a **pod of 4 engineers**.
- Expanded component **test coverage by 54%** through the implementation of Karma and Jasmine suites

EDUCATION

Swami Keshvanand Institute of Technology

B.Tech, Information Technology

Aug 2017 – Jun 2021

Jaipur, IN

- Secured **All India Rank 91** in Round 1 of TCS CodeVita Season 9 (2020).
